Summary

Backend Developer with experience in scalable backend services, REST APIs, infrastructure integration, and test-driven development. Skilled in backend architecture, API integration, database connectivity, and software development.

Education

Adi Shankara Institute of Engineering and Technology

B.Tech in Computer Science

NSS HSS Manickamangalam

Higher Secondary (Bio-Maths)

Nov 2021 – July 2025

CGPA: 7.29/10

2019 – 2021

90%

Skills

Languages: C, Python, Java, JavaScript, HTML, CSS

Technologies: Flask, REST APIs, Git, GitHub, MySQL, PgAdmin

Concepts: Backend Development, API Integration, Unit Testing, Test-Driven Development

Experience

Backend Developer — Equicom Technologies Pvt Ltd, Bangalore

Jan 2026 – Present

- Developed and maintained backend services for Crypko, a cryptocurrency trading platform, focusing on scalable and efficient service architecture.
- Designed and built backend modules from scratch, including REST API development, database integration, and infrastructure connectivity.
- Integrated and managed communication between multiple internal services and external systems to ensure smooth platform operations.
- Handled feature enhancements, bug fixes, service updates, and deployment-related improvements for existing backend services.
- Implemented test case driven development practices and wrote unit test cases to improve code quality, reliability, and maintainability.
- Collaborated with the development team to optimize backend performance and deliver stable, scalable solutions.

Software Engineer Intern — GKS Infotech Pvt Ltd

July 2024

- Developed appointment booking UI and hospital booking system with authentication.
- Automated database extraction and processing workflows.

Projects

VisionAlert - Instant Driver Assistance

Python, YOLOv8, Streamlit

- Real-time driver assistance system detecting hazards, road signs, and speed limits with automated alerts.

Student Portal for Activity Point Calculation

Flask, MongoDB, React

- Multi-user portal for activity tracking, document uploads, and secure result management.

Hospital Appointment Booking System

Flask, Python, PgAdmin

- Web-based appointment booking platform with authentication and automated data handling.

Certifications

- NPTEL: Cloud Computing, Fundamentals of AI
- Infosys AI Foundation and Primer Certification
- Cybersecurity and Ethical Hacking Internship
- ICT AI Certification

Activities

NSS Volunteer | Event Coordinator in Brahma | GDC Execom Member | Hack Club Member | CSI Member

Languages

English (Fluent), Malayalam (Native)
