Summary

Backend Developer with experience in building scalable backend systems, REST APIs, and distributed system integration. Skilled in database connectivity, backend architecture, message queue systems, and test-driven development with a focus on performance and reliability.

Education

Adi Shankara Institute of Engineering and Technology

Nov 2021 – Jul 2025

B.Tech in Computer Science

CGPA: 7.29/10

NSS HSS Manickamangalam

2019 – 2021

Higher Secondary (Bio-Maths)

90%

Skills

Languages: C, Python, Java, JavaScript, HTML, CSS

Technologies: Flask, REST APIs, Git, GitHub, MySQL, pgAdmin, Kafka (Message Queue)

Concepts: Backend Development, API Integration, Unit Testing, Test-Driven Development, Distributed Systems

Experience

Backend Developer — Equicom Technologies Pvt Ltd, Bangalore

Jan 2026 – Present

- Developed and maintained scalable backend services for a cryptocurrency trading platform.
- Designed and implemented REST APIs and backend modules from scratch.
- Integrated internal services with external systems for seamless platform communication.
- Worked on feature enhancements, bug fixes, deployments, and service optimization.
- Implemented Kafka-based messaging workflows for asynchronous communication between services.
- Implemented test-driven development practices and wrote unit tests to improve reliability.
- Collaborated with cross-functional teams to optimize backend performance and stability.

Software Engineer Intern — GKS Infotech Pvt Ltd

Jul 2024

- Developed hospital appointment booking system with authentication and UI integration.
- Automated database extraction and backend data processing workflows.

Projects

VisionAlert - Instant Driver Assistance

Python, YOLOv8, Streamlit

- Built a real-time driver assistance system for detecting road signs, hazards, and speed limits with instant alerts.

Student Portal for Activity Point Calculation

Flask, MongoDB, React

- Developed a multi-user academic portal for activity tracking, uploads, and secure result management.

Hospital Appointment Booking System

Flask, Python, pgAdmin

- Built a web-based appointment booking system with authentication and automated data handling.

Certifications

- Deloitte Data Analyst Virtual Internship Certification
- TCS Cybersecurity Job Simulation Certification
- Siemens Project Management Virtual Experience Program
- NPTEL: Cloud Computing, Fundamentals of AI
- Infosys: AI Foundation and Primer Certification
- Cybersecurity and Ethical Hacking Internship
- ICT Academy: AI Certification

Activities

NSS Volunteer — Event Coordinator (Brahma) — GDC Execom Member — Hack Club Member — CSI Member

Languages

English (Fluent), Malayalam (Native)
